

Press Release

ENTSOG and Gas Infrastructure Europe (GIE) publish the System Development Map 2019/2020

(Brussels, 11 January 2021, PROxxx-21) **The European Network of Transmission System Operators for Gas (ENTSOG), in cooperation with Gas Infrastructure Europe (GIE), have published the ninth edition of the System Development map, which illustrates existing and planned gas infrastructure and gas capacities.**

This map is updated on a yearly basis and is a widely used reference for European and non-European stakeholders alike. It provides useful, accurate and up-to-date information about the recent gas demand in European countries and the capacities in the European gas infrastructure. Historical demand and supply data are also presented.

Jan Ingwersen, ENTSOG General Director, said, *“Information and transparency remain key to support the EU’s energy markets and security of supply and to deliver on the EU Green Deal’s objectives. The System Development Map, published together with GIE, is just one of the tools to do that - it allows for efficient analysis by market stakeholders and it is a useful supplement to the ENTSOG Seasonal Supply Reports.”*

Boyana Achovski, GIE Secretary General, said: *“Over the years, our energy system tends to become more and more integrated, considering interactions between sectors, regions and energy carriers. To tackle the increasing complexity of the future market developments, decision makers need to have access to the most exhaustive, integrated, and up-to-date information. And we provide that.”*

ENTSOG and GIE are committed to further enhancing the information provided on the map for future editions and welcome feedback from stakeholders.

The map is available for download at the ENTSOG website, [here](#) and GIE website, [here](#).

All maps published by ENTSOG and GIE can be ordered at <https://maps.entsog.eu> or <https://www.gie.eu/map-order>.

Should you require any further information, please contact Carmel Carey (+32 2 8945136, carmel.carey@entsog.eu) or Jamila Saoudi (+32 2 2090504, Jamila.Saoudi@gie.eu).

Editorial notes

- > **European Network of Transmission System Operators for Gas (ENTSOG)** was founded on 1 December 2009 in line with Regulation (EC) 715/2009 to promote the completion of the internal market for gas by facilitating cooperation between national gas transmission system operators (TSOs) across Europe and in line with European Union energy goals. More information can be found on the ENTSOG website – www.entsog.eu. Current Members, Associated Partners and Observers can be found at www.entsog.eu/members
- > **Gas Infrastructure Europe (GIE)** is the association representing the interests of European gas infrastructure operators active in gas transmission, gas storage and Liquefied Natural Gas (LNG) regasification. GIE is a trusted partner of European institutions, regulatory bodies and industry stakeholders. It is based in Brussels, the heart of European policymaking. GIE currently represents 70 member companies from 26 countries. GIE's vision is that by 2050, the gas infrastructure will be the backbone of the new innovative energy system, allowing European citizens to benefit from a secure, efficient and sustainable energy supply.
