Subject: EURELECTRIC comments on the 2010 Work Programme submitted by GTE+

Dear Mr. Sisman,

First of all, we would like to thank you again for your participation in our meeting regarding gas issues held on 11 June 2009.

The Working Group Gas, an integrated part of EURELECTRIC's working group structure, has recently discussed the GTE+ work programme for 2010.

Although the consultation process ended in August, the group had a closer look at it and concluded that the programme is very comprehensive and from our point of view it does not require additional changes or adjustments.

In the light of its implementation, we would like to express our willingness to continue close cooperation with your organisation and to have an opportunity to be involved in your future workshops, seminars and consultations.

Yours faithfully,

Hans ten Berge
Secretary General
