Gas Infrastructure Europe (GIE)

GIE MEMBERS

GIE is the association representing the sole interest of the infrastructure industry in the natural gas business such as Transmission System Operators, Storage System Operators and LNG Terminal Operators.

GIE currently has 66 members in 25 European countries.

European Biogas Association (EBA)

European Biogas Association (EBA)

EBA NATIONAL ASSOCIATIONS

EBA OTHER MEMBERS

EBA fully believes in the future potential of renewable gas in Europe. Founded in February 2009, the association is committed to supporting the development of sustainable biogas production and use throughout the continent. EBA counts today on a well-established network of nearly 250 national associations and other organisations covering the whole biogas and biomethane value chain across Europe and beyond.

BIOMETHANE DATA LEGEND

Country - Facility number
- 000 biomethane plant
- 000 bioCNG plant
- 000 bioLNG plant

Location of biomethane production facility
- BE-8 Appels
- New installed plant (if applicable)

25 — Total installed plants
8 — Newly installed plants

- Previously installed biomethane plant
- Previously installed bioCNG plant
- Previously installed bioLNG plant
- Newly installed biomethane plant
- Newly installed bioCNG plant
- Newly installed bioLNG plant

MAP LEGEND

- European country producing biomethane
- Not producing biomethane / no data available

Cross-border / interconnection points
- operational
- planned

Cross-border interconnection point
Intra-country or intra balancing zone point

Transport by pipeline
- under 24"
- 24" to 36"
- 36" and over
- project

The European biomethane market

Europe reaches a total of 1,322 biomethane producing facilities by April 2023 (Figure 1). Of those, 1,174 plants were located by the EBA and displayed on this map. Compared to the previous editions of the European Biomethane map, the number of plants in Europe have steeply increased (483 plants in the 2018 edition, 729 in the 2020 edition and 1,023 in the 2021 edition).

Biomethane production has enjoyed a remarkable growth in the last decade. Whereas 2022 figures are not yet fully consolidated, 2021 has seen the biggest increase in biomethane plants to date, reaching a total of approximately 3.5 bcm of biomethane production in Europe, with an additional 0.6 bcm of biomethane production compared to 2020 (Figure 2). This represents a production increase rate of 20% in 2021 and for the year 2022 an even bigger increase is to be expected.

58% of the biomethane plants currently active in Europe are known to be connected to the distribution grid and 19% are known to be connected to the transport grid. 9% of European biomethane plants do not have a grid connection, and for the remaining 14% of Europe's plants no information is available to the EBA database (Figure 3).

Figures presented above and on the European Biomethane map were originated from the EBA database. A full elaboration of the biogas and biomethane markets can be found in the EBA statistical report 2022.

DATA SOURCES

This map has been built with support of the EBA members, who have provided the necessary data, and EBA Secretariat. Sources for each country are listed in this section.

Data is covering active facilities under operation, according to available data by October 2022. Availability of data depends on the country. Many more plants are planned or under construction.

Additional information is available in the EBA statistical report 2022.
